

PaceSaver® Espree™

"I sell several [scooter lines], but the scooter that I have used for the past twelve years is a PaceSaver".
Bernie Webb, Sec./Tres., Mobility Plus, Inc. (dealer)

Specifications subject to change. Incline stability is determined per US Ansi/Resna Dynamic Stability test 8.2. Stability increases by leaning forward or seat not in highest position.

Five-Year Limited Warranty
Five-year prorated limited transaxle warranty. Three-year prorated limited warranty on Main Frame components. One-year prorated limited warranty covering virtually all internal components including the electronics.

Lifetime Extended Warranty
Lifetime warranty on frame components. Two-year prorated limited parts warranty. Please consult the Owners Manual for eligibility requirements and details of the warranties. Batteries are not part of either warranty.

Battery Charger - Battery chargers are standard equipment with PaceSavers and are a heavy duty, Micro-Light 24 volt constant current fully automatic charger specially manufactured for Leisure-Lift.

Batteries - PaceSavers are designed to utilize size U-1 sealed deep cycle type batteries. These batteries, supplied by your dealer, may be purchased from Leisure-Lift or supplied by a local source. Leisure-Lift only provides warranty coverage on its own batteries. Because they are 24 volts, PaceSavers require two (2) batteries. Please note: all batteries require some form of maintenance. Deep cycle batteries must be kept charged! Batteries left for some time without using and/or charging will go bad.

Set Your Own Pace!

PaceSaver®

Espree™
The spirit of freedom
planted in tradition.

OUR HISTORY

In 1967, Bill and Zella Burke risked all they had to invent and manufacture healthcare products. Mr. Burke said “[I will] dedicate myself to inventing home care products for the infirm”. The resulting family of products allows people to maintain their independence so they can stay in their home close to friends and relatives.

The company that Mr. and Mrs. Burke started employed thirty people; twenty were seniors or disabled and they received national awards for hiring veterans. In our 3rd generation, we continue Mr. Burke’s dedication to building reliable long lasting products and supporting America.

WHAT AMERICAN MADE MEANS TO YOU

Today while many scooters and power chairs are made in low production cost countries like China, PaceSaver continues the 30 year tradition of building to a higher standard of durability and reliability. We are the **only** manufacturer of scooters and power chairs to build all our models in the U.S.A. Because our products are built in the U.S.A., the FDA inspects our plant for design controls, good manufacturing practices and quality systems on a regular basis while foreign plants are not. Industry tests of foreign products reveal poor quality components and designs that do not work as claimed or worse are dangerous if used per the instructions in the owners manual. American made gives you a higher level of Quality Assurance.

AMERICAN MADE MEANS U.S. STOCKED PARTS

U. S. stocked parts keeps your scooter running for years. We stock millions of dollars worth of parts in Kansas City, whether for new product or decades old. Our parts are “over here” not “over seas”! So over 90% of our replacement parts are shipped within one working day.

AMERICAN MADE KEEPS AMERICANS WORKING

Leisure-Lift keeps all of America working! We buy over 5,000 parts manufactured by 580 vendors located in 44 different states. The efforts of people from all over the United States go into our mobility products.

Bill Burke, PaceSaver

The New Com-For-Back™ Bucket Seat for all day support & comfort.

All PaceSaver products are built in America.

Extra Degree of Protection™

- Incline stability is determined per US Ansi/Resna Dynamic Stability Test 8.2.
- A confident ride - indoors & out.

Mirror Glaze™ Lasting Beauty

- Rich “depth of color” reflective finish.
- Color “through and through” ABS substrate.
- Won’t chip, peel or fade.
- “Scratch guard” easy maintenance.
- Deep clear coat hardened acrylic layered.
- Simply wipe with damp rag or wax.
- No paint, No ugly touch ups.

Choices
